

Dina Becirovic

Dina currently serves as the Director of Development, Engagement, and Partnership. She is currently serving as the Chief Operating Office at The Bloc, a Nebraska nonprofit organization. Dina was employed by the University of Nebraska Medical Center's Foundation for the Accreditation of Cellular Therapy, where she oversaw the stem cell transplant accreditation process from start to finish for various blood and marrow transplant programs and cord blood banks. She is an Adjunct Professor at the College of Saint Mary's, Medical Interpreting Department, and an Adjunct Instructor at the Metropolitan Community College. Dina graduated from the University of Nebraska at Omaha with a Bachelor's Degree in biology, chemistry, and Spanish. She completed her Masters of Public Health degree at Creighton University. She completed her Masters of Arts, Language Teaching program with an emphasis on Teaching English to Speakers of Other Languages (TESOL) at UNO. In the fall, Dina begun studies in the Doctor of Education program at the Johns Hopkins University School of Education.

Dina had an active role in several hereditary cancer research publications alongside Dr. Henry T. Lynch. She completed her capstone project at the Hereditary Cancer Research Cancer Center at Creighton University that shed light on colonoscopy screening adherence rates in high-risk Lynch Syndrome individuals. Currently, Dina is working on a study that hopes to illuminate perceptions that Muslim women have on health and well-being.

Dina is a native of Bosnia and Herzegovina. She is fluent in Bosnian, Serbo-Croatian, with intermediate proficiency in Spanish. Her passions are education, health, and political science. Her hobbies include experiencing the world through travel, languages, culture, and food. Dina is passionate about changing the lens through which the world sees refugees and immigrants. Also, she seeks to make the world better and kinder through education and looks forward to making an impact on a global scale.
